New York, Nov. 24.—Archbishop Corrigas has issued the following pastoral letter to the Catholic clergy:

New York, Nov. 19.—Dear Sir: Letters are beginning to arrive from Ireland samestly requesting assistance for the poor in the distressed districts. The last European mail brought me three such poor in the distressed districts. The last European mail brought me three such appeals—one from a bishop, another from Presentation sisters in county Galway, a third from Sisters of Mercy in county Mayo. All tell the same story of awful want and still greater prespective misery. A single sentence from one of these writers will suffice to show the pressing need of help. The first objects who claim our sympathy, say the Presentation sisters, "are the young children pitifol little creatures with pinched hands and pallid faces, with shivering, half clothed limbs, and feet not only bare, but bine and blustered with the cold. These poor children crowd our schools, many of them coming long distances that they may spend a few hours in a warm room and spend a few hours in a warm room and receive the spanty pittance offered that we try to provide for them."
My own observation, during a recent visit to Ireland, enables me to attest to the

reality of the distress. The potato crop-even then was in many places blackene; and blighted and nothing but continuous sunshine could save it from almost total failure. Unfortunately instead of fair weather the rain continued to pour down daily and it how is true that thousands of our brethren in the faith—thousands of our own flesh and blood—are in danger of

In view of these circumstances, reverend and dear sir, please appropriate and dear sir, please announce a special collection for the relief of these sufferers to be taken up in your church, on Sunday, November 30th. The amount when re-ceived will be forwarded to the bi-hops and clergy of the districts, who promise in re-turn to use every means to the judicious distribution of the relief and unite their grateful prayers to these of their flock for the contribution.

Mr. Thatcher of New York, opposed the report. His principal objection, he said, was to the partisan and political character of the scheme. The gentleman who proposed the plan was better equipped for it than any other man in the country, but he personally represented the gentleman who is now the secretary of state. He objected to having the official seal of the commission put on a matter of purely political sion put on a matter of purely political purposes, and which he believed was origi-nated to further the political fortunes of the distinguished gentleman who occupies
